Eric,

Go ahead with the Packer purchase. Do not rent the camera. We will use the DRMS camera.

Thank you,

Stev

I just got off the phone with Baski, the packer company Russ guided me to and the packer is

going to be around \$3000.00. Let me know what you would like me to do.

Thanks

Eric,

The requested purchases below are approved with the exception of the camera at this time. I will check to see if the DRMS camera is available; it's probably bulkier and requires dragging in the line, but it's probably adequate.

So, proceed with the fittings and hose. Let me know on the Packer Unit; I thought Russ had identified a supplier with prices.

Thanks,

Steve

Steve,

I'm working on getting all the equipment for the Red and Bonita packer test, and wanted to get your approval for the purchase of critical parts needed for this test. I will be needing about \$150 in brass fittings, and about \$600 in hose for the test. Also, a 4-way fiber optic camera to rent is about \$349 per day and \$1745 for a week. I am also looking at a packer, but I don't not have a cost for that yet. I will let you know as soon as I have a cost.
